Helping People. It's who we are and what we do.

Introduction

During the 79th legislative session, Senate Bill (SB) 539, which supports prescription drug transparency, was approved. SB 539 was codified in Nevada Revised Statutes (NRS) 439B. The law requires in NRS 439B.630 that the Department of Health and Human Services (DHHS) compile a list of prescription drugs essential for treating diabetes and asthma in Nevada:

NRS 439B.630 Department to annually compile lists of certain prescription drugs essential for treating asthma and diabetes. On or before February 1 of each year, the Department shall compile:

1. A list of prescription drugs that the Department determines to be essential for treating asthma and diabetes in this State and the wholesale acquisition cost of each such drug on the list. The list must include, without limitation, all forms of insulin and biguanides marketed for sale in this State.
2. A list of prescription drugs described in subsection 1 that have been subject to an increase in the wholesale acquisition cost of a percentage equal to or greater than:
 - a) The percentage increase in the Consumer Price Index, Medical Care Component during the immediately preceding calendar year; or
 - b) Twice the percentage increase in the Consumer Price Index, Medical Care Component during the immediately preceding 2 calendar years.

(Added to NRS by [2017, 4297](#); A [2019, 1465](#))

The first essential diabetes drug list was published on October 31, 2017. The 2020 Essential Drug List identifies Nevada's essential diabetes and asthma drugs as of the publication date and also indicates if these drugs underwent a significant price increase as defined by NRS 439B.630 (2). Labelers that manufacture (including repackers or relabelers), or distributes drugs found on this list are required to submit reports by April 1, 2019 that include information about these drugs as outlined in NRS 439B.635 and NRS 439B.640. Additionally, Pharmacy Benefit Managers (PBMs) are required to provide information to DHHS by April 1, 2019 regarding these drugs as outlined in NRS 439B.645. Data from these reports will be aggregated and published in the DHHS report required by NRS 439B.650 by June 1, 2020.

Report Methodology

To compile the 2020 DHHS Essential Drug list, DHHS utilized a methodology that met the requirements of NRS 439B.630. Two versions of the list are published: (1) a summary of the nonproprietary and brand or proprietary drug names found on the essential list [Appendix 1], and (2) a detailed list of all the National Drug Codes (NDCs) indicated by DHHS as essential drugs for diabetes and asthma and if each drug NDC experienced a significant price increase [Appendix 2]. The summary list (Appendix 1) provides a concise outline of the essential drugs, while the NDC list (Appendix 2) identifies the specific drug NDCs that will be monitored by DHHS and included in the yearly report.

To generate the final list, DHHS compiled an initial list of diabetes and asthma drug NDCs that included varying drug packing formulations based on prior and current stakeholder input of essential diabetes and asthma drugs. These NDC codes were filtered down to include the drugs for which Nevada Medicaid expended funds in 2018 and/or 2019.

This essential list does not include any drugs used to treat co-morbidities often present in individuals with diabetes or asthma. The list does not contain every single drug that may be an effective treatment for diabetes/asthma. This list attempts to refine the numerous treatments to those approved for treatment, identified by prescribers as essential, and most frequently prescribed in Nevada (as determined by publicly available data sources). For this reason, some brand names are excluded while generics or alternative brands are included.

DHHS welcomes feedback regarding this report. DHHS strives to ensure that consumers receive accurate information. Any identified errors, omissions, or feedback can be submitted to the department via email at drugtransparency@dhhs.nv.gov.

DHHS invites you to view the Drug Transparency website at drugtransparency.nv.gov. If you are interested in receiving email notifications for Nevada Drug Transparency information and updates, please subscribe online at <http://drugtransparency.nv.gov> to the DHHS Drug Transparency LISTSERV.
