# Background

- Nevada Medicaid implemented telehealth services in September 2012 as an optional benefit.
- Reimbursement required the originating site to be located in a rural county and to substitute for an in-person encounter.
- Settings, provider qualifications and services were limited.

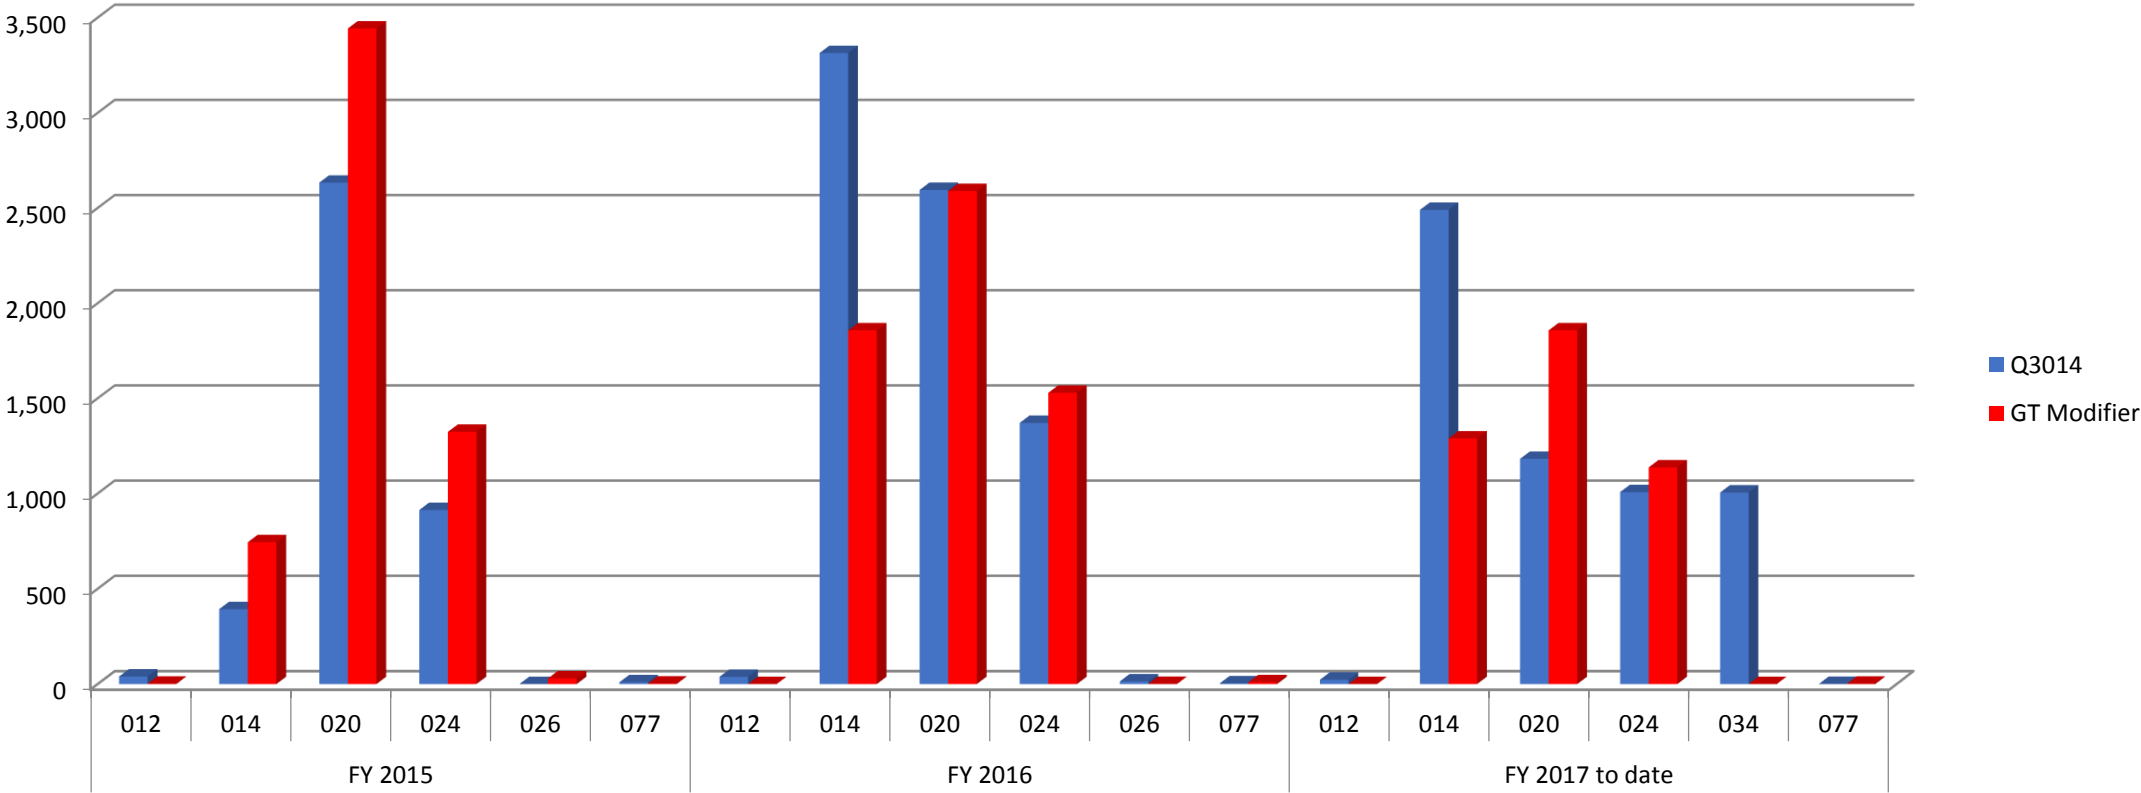

# Expansion of Telehealth

NV Medicaid revised coverage policies in December 2015 with the passage of AB 292.

- Removed all geographical barriers;
- Expanded policy to all providers acting within their scope of practice;
- Expanded covered services to all services that can appropriately be delivered via telehealth; and
- Included broader technology

# Utilization Trends Fee-for-Service Claims Paid

Telehealth Services by Provider Type - FFS

# Utilization Trends Managed Care Organization Claims Paid

Telehealth Claims Paid by Provider Type - MCO
